

TRANS KLEEN™

AUTOMATIC TRANSMISSION CLEANER

Over time, debris can accumulate in the transmission, leading to rough shifting, slipping and other performance issues. TRANS KLEEN™ Automatic Transmission Cleaner is a specialized cleaning solution designed to quickly and completely remove dirt, sludge, varnish and other deposits from automatic transmission systems. Use during a transmission fluid exchange or as part of regular engine maintenance.

Directions:

TRANS KLEEN™ Automatic Transmission Cleaner may be used with an approved power flush machine or fluid exchange system. Follow manufacturer's instructions on the use of the machine.

1. Add one bottle of TRANS KLEEN™ to transmission before servicing or replacing any fluid.
2. Start vehicle and allow to warm up to operating temperature. Drive vehicle for a few minutes allowing the transmission to shift through all the gears; or with the car raised so the wheels are safely off the ground, shift transmission through all the gears so that TRANS KLEEN™ is completely circulated through the system.
3. Turn engine off and drain transmission fluid.
4. When adding new fluid, keep engine running and transmission in park. After re-filling, depress the brake pedal and shift the transmission through all the gears to circulate the new fluid. Check fluid with the dipstick and add additional fluid if needed.
5. When transmission service is completed, add a bottle of TRANS VITAL™ Automatic Transmission Conditioner for preventative maintenance and enhanced transmission life.

Product Number and Packaging:
#8009 – 24 per case

DANGER: Harmful if inhaled. Wear protective gloves/protective clothing/eye protection/face protection. Avoid breathing dust/fume/gas/mist/vapors/spray. Use only outdoors or in a well-ventilated area.
